PRE-INCISION TIMEOUT

- ☐ Physician initiates: "Is everyone ready to begin? Please introduce yourselves."

CONFIRMATION OF PATIENT INFORMATION

- ☐ Verify patient name via armband/verbal check and consent match
- ☐ Verify procedure name and consent
- ☐ Ensure surgical site is marked/confirmed
- ☐ What allergies are there for patient?
- ☐ Verify code status
- ☐ What part of the medical history is pertinent?

CRITICAL STEPS/ SUPPLIES

- ☐ What medications were administered preoperatively?
- ☐ What antibiotics are needed?
- ☐ What supplies, implants, medications, and equipment are needed? Are they available?

FIRE RISK ASSESSMENT

- ☐ Is there alcohol-based skin antiseptic/other flammable solution being used?
- ☐ Is the operative/invasive procedure being performed above the xiphoid process or in the oropharynx?
- ☐ Is there open oxygen or nitrous oxide being administered?
- ☐ Is an electrosurgical unit, laser, or fiber optic light being used?
- ☐ Are there any other possible contributors to fire risk (e.g., defibrillators, drills, saws or burrs)?

FINAL CHECK

- ☐ Are there other concerns to discuss (e.g. anesthesia, nursing, etc.)?
- ☐ Physician states: “If anyone sees anything unsafe or not in the best interest of the patient, I expect you to speak up and bring it to our attention.”

IMMEDIATELY PRIOR TO INCISION

(If physician leaves the room after initial timeout)

- ☐ Patient name
- ☐ Procedure
- ☐ Site confirmation
