Telehealth Patient Consent Form

I agree to receive this health care service, (type of service) _____, as a telehealth service. I understand that the health care practitioner providing this service is located at another location (the facility listed below).

A telehealth service means that my visit with Practitioner(s) from the Department at the distant site will happen by using special audiovisual equipment. I understand telehealth services are not the same as face-to-face services since I will not be in the same room as Practitioner(s) from the Department, and the information provided to him or her may be insufficient to allow for treatment and medical decisions to be made. If that is the case, I understand that an in-person, face-to-face visit may be needed. I also understand I have the right to have a face-to-face visit from a provider of my choice instead of these telehealth services if I so choose. I understand that Practitioner(s) from the Department is not obligated to provide any treatment or service above and beyond the purpose of the scheduled telehealth appointment.

I authorize the electronic transmission of my medical information via a telehealth connection so that it can be viewed by Practitioner(s) from the Department at the distant site, as well as the recording of services if necessary to facilitate care. This consent is valid for one year for follow-up telehealth services with Practitioner(s) from the Department, unless I withdraw it by notifying Nebraska Medicine.

I can **decline** the telehealth service(s) at any time. In that case:

- I will still have the right to receive future care or treatment, and any program benefits to which I would otherwise be entitled to will not be taken away as a result.
- I may have to travel to see a health care provider in-person. I understand this may cause a delay in care and I understand those risks.

My records will remain **confidential**, and:

- The same confidentiality protections that apply to in-person services also apply here.
- I will have access to all medical information from these services as provided by law.
- Information from these services (including images that can be identified as mine) cannot be released to researchers or anyone else without my additional written consent.

I have input on **who is present** and involved in furnishing these services, and:

- I will be informed of anyone who will be present at all sites during these services.
- I may exclude anyone from any site during these services.
- An appropriately trained staff person has been designated to be immediately available if an urgent need arises, **or** I have been informed ahead of time that this is not available and have waived the availability.

I have read this document carefully, and my questions have been answered to my satisfaction.
